Professional Summary

Data Analyst and AI & Data Science graduate with hands-on experience in Python, SQL, Power BI, and Tableau. Skilled in data cleaning, exploratory data analysis (EDA), and building interactive dashboards. Familiar with machine learning concepts including recommendation systems and classification. Passionate about solving real-world problems using data and open to roles in data analytics, data science, and related fields.

Technical Skills

Programming: Python, SQL

Databases: MySQL | PostgreSQL | Microsoft SQL Server

Data Analysis: Pandas, NumPy, Data Cleaning, EDA

Visualization: Power BI, Tableau, Matplotlib

Machine Learning: Recommendation Systems (Content-Based), Classification (Basic), Model Evaluation

Tools: Git, GitHub

Projects

- ❖ Hungry Bird – Street Food Discovery & Recommendation System

Tech Stack: Python, Pandas, Scikit-learn

Live Project: https://saranshjais.github.io/Portfolio/_projects/hungrybird.html

 - Developed a system to discover famous and hidden street food places along with their locations
 - Built a recommendation engine to suggest food spots based on user input and preferences
 - Used Pandas for data cleaning, structuring, and handling food and location datasets
 - Implemented filtering and basic similarity logic to match user preferences with relevant food places
 - Provided location details of street food spots to help users easily explore nearby options
 - Focused on identifying both popular and lesser-known (hidden) food destinations
- ❖ Blinkit Sales Analysis Dashboard

Tech Stack: Power BI, SQL, Python

Live Project: https://saranshjais.github.io/Portfolio/_projects/blinkit.html

 - Cleaned and transformed 8K+ Blinkit sales records using SQL and Python for analysis-ready datasets
 - Conducted Exploratory Data Analysis (EDA) to identify sales patterns and product demand trends
 - Built an interactive Power BI dashboard to track KPIs including revenue, category performance, and outlet sales
 - Analyzed top-performing product categories and regional sales distribution
 - Presented insights using data storytelling and interactive visual analytics
- ❖ Airline & Airport Performance Dashboard

Tech Stack: Python, Tableau

Live Project: https://saranshjais.github.io/Portfolio/_projects/airline-tableau.html

 - Processed and cleaned airline operational datasets using Python (Pandas) to prepare analysis-ready data
 - Created calculated metrics including delay percentage, cancellation rate, and route performance indicators
 - Built an interactive Tableau dashboard to analyze airline performance and airport efficiency
 - Visualized flight delays, cancellations, and busiest routes through dynamic charts and filters
 - Enabled users to explore operational insights using interactive dashboard features

Educational Details

B.Tech (Artificial Intelligence & Data Science) , Arya College of Engineering & I.T.	2021 – 2025
7.60 CGPA	
CLASS XII (C.B.S.E.) , Air Force School	2020 – 2021
78.6%	
CLASS X(C.B.S.E.) , Air Force School	2018 – 2019
75%	

Certifications

Imarticus Learning – Data Science & Analytics Certification	2025
Machine Learning Using Python.	2024
Data Science using Python.	2023
Red Hat Certified System Administrator (RHCSA)	2023
